

To the FCC:

I think that imposing copyright protection technology into televisions (proceeding 02-230) is a horrible idea. I am concerned that my intrests as a consumer are being grossly overlooked in favor of the copyright holders' intrests. I am unwilling to sacrifice my rights for copyright holders' profit margins, and I am convinced that this is the only thing that such regulations would ensure. Do not mandate copy protection technology into televisions, digital or otherwise.
